## Professional Summary

Data Analyst with hands-on experience in Excel, SQL, Python, and Power BI, supported by professional experience in data reporting, sales analytics, inventory management, and dashboard development. Skilled in data cleaning, exploratory data analysis (EDA), SQL querying, and building interactive reports to transform raw data into actionable business insights. Experienced in analyzing sales and operational data, automating reporting processes, and maintaining high data accuracy. Passionate about leveraging data-driven solutions to improve business performance and eager to contribute analytical expertise in a growth-oriented organization.

## Professional Experience

### Data Analyst Intern

Jan 2026 – Present

Full Stack Academy

Hyderabad, India

- Analyzed large-scale datasets using Python (Pandas, NumPy), SQL, and Excel to uncover business trends, delivering performance reports that directly supported decision-making across multiple project cycles.
- Designed and built interactive dashboards and visualization reports consolidating multi-source data into single stakeholder-ready outputs, reducing manual reporting effort by an estimated 40%.
- Automated data cleaning and EDA workflows using Python, improving processing efficiency and maintaining 95%+ dataset accuracy across all project deliverables.
- Collaborated with cross-functional stakeholders to translate analytical findings into clear, data-driven recommendations aligned with business goals.

### Billing & Data Support Executive

Sep 2023 – Jan 2026

AY Handloom – Wholesale Textile Store

Hyderabad, India

- Managed and validated daily sales and inventory records with high accuracy, ensuring error-free documentation across billing and stock operations at scale.
- Built Excel-based sales tracking and inventory monitoring reports used by management for weekly operational reviews, improving visibility into business performance.
- Identified and resolved data inconsistencies across transaction logs, strengthening data integrity and reducing reconciliation errors during monthly financial audits.

## Projects

### Sales Data Analysis

Excel, SQL, Python

- Cleaned and analyzed multi-period sales datasets to identify revenue trends and top-performing product segments, generating actionable monthly business insights for stakeholders.
- Built Excel dashboards with dynamic charts and summary reports, enabling data-driven decision-making for sales strategy and inventory planning.

### Customer Churn Analysis

Python, Pandas, Matplotlib

- Conducted exploratory data analysis on customer behavior data to identify key churn drivers, producing visualizations that highlighted at-risk customer segments with statistical clarity.
- Generated retention strategy recommendations based on churn pattern analysis, demonstrating ability to translate data findings into measurable business action.

### COVID-19 Trend Analysis

Python, Pandas, Matplotlib

- Processed global COVID-19 datasets containing confirmed cases, recoveries, and deaths.
- Cleaned and analyzed time-series data using Python and Pandas. Created visualizations showing infection growth, mortality rate, and recovery trends.
- Developed analytical reports highlighting pandemic trends using data visualization..

## Technical Skills

**Programming & Query Languages:** Python (Pandas, NumPy, Matplotlib), SQL (Joins, Aggregations, Subqueries, Query Optimization)

**Data Analysis & Visualization:** Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis, Time-Series Analysis

**Business Intelligence & Reporting:** Power BI (Interactive Dashboards, KPI Reporting, DAX), Microsoft Excel (Pivot Tables, VLOOKUP, XLOOKUP, Conditional Formatting, Data Validation, Dynamic Charts)

**Tools & Platforms:** MS Office Suite (Word, PowerPoint), Windows OS

## Education

Bachelor of Technology – Computer Science and Engineering

2022

Nawab Shah Alam Khan College of Engineering and Technology

Hyderabad, India
